Chapter 1. Purpose & Intent Introduction**41:1-2. Introduction to Zones/Zoning Districts**

MX-3 Mixed-Use 3: Residential & Commercial (High Density)

Mixed Use 3: Residential & Commercial (MX-3) zoning allows for a blend of high density residential and commercial uses in the same building or district, within a half (1/2) mile from Newark Penn Station. It builds upon Newark's strength as a multimodal transportation hub to support the Downtown Core District, expand housing and economic opportunities along the area's major streets and transportation corridors and protect adjacent low-density neighborhoods. It promotes a walkable neighborhood with a vibrant commercial/retail zone. The district's bulk standards allow taller buildings – up to twelve (12) stories high with a minimum lot area per dwelling unit of two hundred (200) square feet.

Commercial development in MX-3 zones allows for ground-floor commercial use with commercial or residential uses above.

MX-3 zoning is applied in areas where there is some existing mix of residential, commercial and industrial uses, such as along Lafayette Street, Union Street and Ferry Street and in under-utilized areas near Newark Penn Station where the predominant use is surface parking, such as along New Jersey Railroad Avenue, Bruen Street, McWhorter Street, Prospect Street and Congress Street.

Learn more about the specific uses that are permitted and prohibited in MX-3 zones in section 41:4-4. Permitted Uses in Mixed-Use & Other Districts.

Learn more about the size and design of buildings permitted in MX-3 zones in section 41:5-2. General Bulk & Design Standards.
